EDUCATION

Rajiv Gandhi College of Engineering and Research -[RGCER] Nagpur
Bachelor of Engineering in Computer Science and Engineering *July 2019 – May 2023*

Shri Jayantrao Wanjari Junior College Nagpur
Science Stream *July 2017 – March 2019*

PROJECTS

Data Summarization in NLP | *React.js, Python, MySQL, Tailwind* April 2024 – June 2024
- Developed an NLP-based system to extract key insights and generate concise summaries from large textual datasets, enhancing information retrieval and decision-making efficiency.

My-Portfolio | *React.js, Bootstrap* Aug 2024 – Nov 2024
- **My-Portfolio** is a sleek and responsive personal portfolio website built with **React**, **Bootstrap**, and **MaterialUI**. It showcases projects, skills, and experiences with a modern design, smooth animations, and a user-friendly interface.

TECHNICAL SKILLS

Languages : TypeScript, JavaScript, HTML, CSS, SQL
Frontend Frameworks & Libraries : Next.js, React.js, Tailwind CSS, Material-UI, WordPress
Backend Technologies : Node.js, Express.js, Strong OOP Fundamentals
Database : MySQL, MongoDB, SQL (Postgres)
Version Control : Git, GitHub
Project Management : Jira, HRM
Cloud & Hosting : VPS, AWS EC2

WORK EXPERIENCE

Digitalize The Globe - [DTG] 18 July 2024 – Present
Web Developer *Pune*

Property-Drone | *Next.js, Node.js, MySQL, Tailwind* Feb 2025 – present
- Builting a scalable real estate platform using Next.js and Node.js, integrating dynamic property listings, user authentication, and interactive maps for seamless user experience.

Build - Infinity | *Next.js, Tailwind* Jan 2025 – Feb 2025
- Developed and optimized a responsive web application using Next.js and Tailwind CSS, ensuring seamless user experience across devices. Implemented dynamic components, API integrations, and performance enhancements for improved scalability.

Klas - Info | *Next.js, Tailwind* Dec 2024 – Jun 2025
- Developed a high-performance React project using Vite and Tailwind CSS, ensuring a sleek, responsive UI. Integrated smooth, classy animations for an enhanced user experience

GreekArray | *React.js, .NET, MySQL, Tailwind* | *DTG* Oct 2024 – Dec 2024
- Developed a feature-rich blog management platform using React.js and .NET, incorporating functionalities such as likes, comments, bookmarks, notifications, user interactions, and blog creation. Continuously enhanced with additional features to improve user engagement and content management.

CFRE | *React.js, Node.js, MySQL, Tailwind* Aug 2024 – Nov 2024
- A **fast and powerful** real estate platform with a **strong search bar** and **multiple filters** for precise property searches. It integrates **multiple APIs** for real-time listings, Google Maps, payments, and CRM sync. Optimized for **high performance, scalability, and seamless user experience** across devices.

ACHIEVEMENT:

Built and deployed scalable full-stack applications with seamless API integrations, real-time chat, secure payment gateways, and optimized cloud infrastructure, enhancing user experience and system efficiency.
